Wax modelling

Type B modelling wax comes in hard sheets or blocks

Place wax in water tight plastic bag.

Now place the plastic bag in a container of medium - hot water and keep it there for 2-3min

The wax becomes soft and easy to model

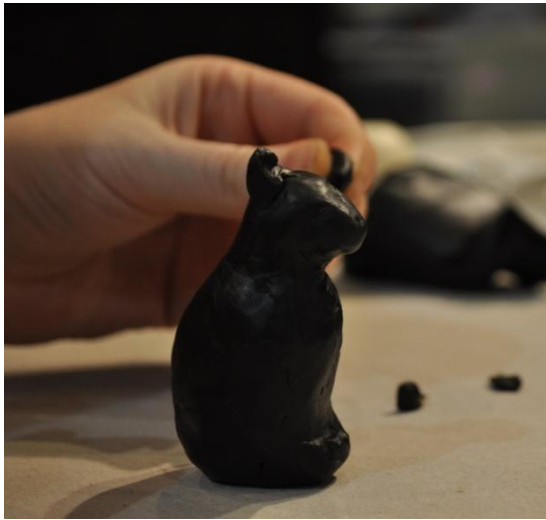

RA

Work quickly to get the rough shape of the object you would like to model, you can add and take away wax as you go along

You can add and take away wax as you go along.

Your final sculpture will slowly harden again once you stop modelling it.
