

Curious Creatures - Making Guide

Royal Academy Family Workshop 28th February 2016

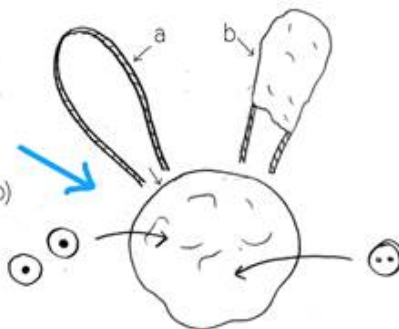

1. Start with the cardboard body base

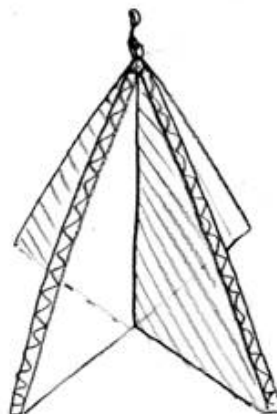

2. Attach wire by puncturing the cardboard and threading through. Small hands will need help with this bit.

4. Make the head of your creature using clay, plasticine or wax. Long ears or other attachments to be covered in clay will need some support from wire (see a & b)

5. Attach the head to the body base

6. Use fabric, googly eyes, ribbon, wool and buttons to decorate your creature and make him or her come to life!
